TMR6000 is a Extra Heavy high-speed Hybrid loom developed specifically for the production of
Forming, Dryer and Industrial fabric.

TMR6000 is developed from very well-known technology such as:

- TEXO band rapier with its "POZI-GRIP" system
 - TEXO "DISCO" Dobby system
 - Loom Control system "LoCoMo III"

and many other high "tech" features developed by TEXO through many years of experience in
the industry.

WORLD WIDE WEAVING MACHINES

TEXO's goal is to increase the value and profitability of our customer's business with the help of customized products and comprehensive service.

Since our founding in 1943, we have developed, designed and supplied over 1,100 weaving machines over the years.

TEXO's headquarter is located in Älmhult, Sweden with manufacturing facilities in Sweden and China. Our subsidiaries, TEXO Inc. in Greenville SC, USA and TEXO Pacific Co., Ltd in Shanghai, China are responsible for sales and support in their geographical areas.
